### The electrical efficiency miracle

The experts at TITAN have done their utmost to develop a compact, service-friendly and efficient head for plastic strapping with friction weld joint.

The result is impressive: The T200 offers ultramodern drive technology in the smallest format. One DC drive per function eliminates the need for a wear-prone coupling. The strap tension is set electronically reaching up to 2,500 N / 520 lbs.

The T200 works with PP and PET strapping sizes from 3/8" to 5/8" width. That's why building materials, logistics and general pallet strapping applications prefer this head.

Further T200 defining advantages: Thanks to its narrow design, the head can also be used horizontally for strapping close to baseboard. Overall, TITAN succeeded in creating a small engineering masterpiece.

#### **Technical Data**

| Kind of drive         | Electric   |
|-----------------------|--|
| Tension force         | 200 - 2,500 N (adjustable) Standard 200 - 1,200 N<br>(adjustable) when using small counter-plate |
| Power supply system   | 24 V DC  |
| Current consumption   | max. 25 A  |
| Power                 | max. 600 W   |
| Strap conveying speed | ca. 3.2 m/s<br>approx. 10.5 ft/s   |

| Dimensions | 560 x 215 x 430 mm (L x W x H)<br>22.0 x 8.5 x 16.9" (L x W x H) |
|------------|--|
| Weight     | ca. 60 kg approx. 132.3 lb                                       |

## Strap/Joint

| Type of strap   | Plastic strap                          |
|-----------------|--|
| Strap           | PP<br>PET                              |
| Strap width     | 9, 12, 16 mm<br>0.354" ; 0.472" ; 5/8" |
| Strap thickness | 0.6 - 0.9 mm<br>0.024 - 0.035"         |
| Kind of seal    | Friction-weld joint                    |

#### Minimum bearing area

| 125 mm (Standard) 100 mm (when using small counter-plate) 4.9 in (Standard) 3.9 in (when |
|--|
| using small counter-plate)   |

## Application

Bundling, stacking and securing of packages
